SILVERSURFERS

The new range of SilverSurfers assisted baths have been designed by caring professionals for professional carers. At the touch of a button, the powered seat gently lifts and safely rotates the bather into the bath. The carer can then raise the bath to a convenient bathing height to reduce the risk of back problems. The assisted baths are delivered ready for easy connection to the services by our experienced installation team, if required. ABC offers a choice of sizes and styles, with WRAS approved taps, valves and shower sprays. Our baths are designed and manufactured in the UK with in-built reliability using the latest technology, and all are hand built to achieve our luxurious finish.
