

AQUASULIS

The Bariatric bath
Designed by caring professionals
for professional carers

AQUASULIS

The AquaSulis Bariatric bath has been designed specifically for use in non-domestic situations by the larger framed person to be able to sit comfortably in a well-supported bath that allows for deep soak bathing. Similar in design to our AQUASERENE range it allows a wider door aperture for easier access and egress, plus greater seating width internally for more comfort and soaking bathing depth.

The outward opening door gives easier width access and more manoeuvrable space whilst standing especially if we add the shower canopy and curtain.

AquaSulis Options	Standard	Optional
Powered seat	n/a	n/a
